

Meeting in Luxembourg, September 2010

The preparations for the meeting in Luxembourg from Thursday 9th to Sunday 12th of September started longtime before its beginning because the site in the forest Nelling near Rumelange had to be organized, as well as the supply in eating and drinking for almost 30 persons during 2 days.

Thursday the 9th of September was devoted to work on the organization of the project: what is already done, what has still to be done?, and finished with a reception in the town hall with all the partners, the municipal council and the school inspector.

Fortunately the weather conditions were on the side of the Comenius project (or perhaps thanks to Bernadette who lightens always a candle when the Comenius partners are visiting a church all over Europe), because the land art workshop in rain and mud wouldn't stay in such a good memory of everybody.

The 2 days passed in the open country, working the wood, iron, vegetation, leg of mutton and wine was a welcome change from the usual Comenius meetings. Everybody could demonstrate his craftsmanship and creativity, and in the evening all could look on a sturdy work.

The results of this meeting are worth seeing, and even in winter the sculptures and works of art haven't lost anything of their beauty and originality.
